

It is no secret that we have shifted to Traditional European Medicine. Based on this philosophy, which sees the human being not in isolation but as part of nature, we offer an exceptional, holistic concept of facial and body treatments - the **Saint Charles Herbal Treatments**.

In accordance with the healing knowledge of Traditional European Medicine, we take a holistic approach to skin beauty. The Saint Charles Herbal Treatments have the overarching goal of **harmonising body, mind and spirit** and bringing back into balance what has become unbalanced. In addition to **traditional massage techniques**, the treatment is complemented with other products such as Saint Charles Herbal Teas, Saint Charles Herbal Essences and Saint Charles Aromatherapy.
